EVANDER CHILDS HIGH SCHOOL
NEW YORK CITY

When first we heard the awesome word grade adviser, it filled us with visions of menacing ogres and marble-hearted ogresses. When first we saw our grade adviser we looked into eyes of softest, kindest blue; heard a voice filled with tones of infinite patience and tenderness; met a living example of that which she quietly preached: self-effacing modesty, keen insight, untiring application, stern and unswerving honor. To the officer, to the character, to the woman, Florence Clark—we most gratefully dedicate this volume.

A Glance Backward

In February, 1915, Morris High School organized two annexes: Fordham, in P.S. 46, and Westchester, in P.S. 47, with Mr. Blakely, chairman of English Department, in charge. In September, 1915, these annexes and another, Williamsbridge, became a new high school, called the Evander Childs High School, in memory of a distinguished educator of The Bronx. Gilbert S. Blakely was appointed principal. The Bedford Annex was organized in September, 1914, the Wakefield Annex, in February, 1915, and the Unionport Annex, in September, 1915. The cornerstone for the "new building" at East 184th Street and Creston Avenue was laid May 6, 1915, and the building was occupied in September, 1918.

The first Field Day was held in Pelham Park in May, 1914; the first G.O. election took place in February, 1914. Our first publication was *The Bridge*, produced in the fall of 1915 by a sixth-term commercial class at Williamsbridge. The *Evander News* first appeared in the fall of 1919, while *The Oriole* came into our midst, aided by Miss Woodman, in June, 1920. The first Handbook appeared in 1914. The Honor League was organized in the spring of 1917, and became a chapter of the *Arista* in 1924. In 1926, a Junior *Arista* was organized. The Lunch Room was opened in the fall of 1918. As long ago as 1917, Mr. Schamus coached a debating team which defeated Townsend Harris Hall. The first concert was given by the Glee Club and Orchestra in December, 1914.

In the early days, dramatics coaching was shared by Mr. Raubicheck, Mr. Wechsler, Miss Edmunds and others. Later Mr. Knickerbocker and Mr. Fernschild contributed their zeal. From 1922 until 1926, the productions were directed by Miss Dillon with the collaboration of Mr. Raubicheck, Miss Nightingale, Miss Cusack, Mr. Arnold, Miss Herring, and Miss Taylor. In 1930, Miss Owens became dramatic adviser. Our dramatic destinies are today in the very capable hands of Mr. Friedlander.

In May, 1925, we celebrated the tenth anniversary of the founding of the school. The celebration began with a faculty luncheon at the Hotel Astor, commemorating Mr. Blakely's ten years service as principal. It ended with the presentation of "Road to Yesterday," the first Alumni play.

Evander's name has become well known through her success in debating. Under the guidance of Mr. Schamus, our students won the Hamilton declamation contests in 1924 and 1925. In 1926, we were the only school in the country having two successful competitors in the Franco-American Good Will Oratorical Contests.

In more recent years, there have been the most significant changes: After the death of Mr. Blakely, on October 20, 1925, Mr. Norr, who had been administrative assistant, succeeded as principal. Realizing that the former main building had outgrown the conditions of the times, Mr. Norr made plans for a new main building on Gun Hill Road. The school was opened in the fall of 1930. In the same year a new annex was established at Shakespeare Avenue and 172nd Street. It was named Blakely Annex in honor of our beloved first principal, Gilbert S. Blakely. Eight years after his appointment, to the very day, Mr. Norr passed away suddenly on January 19, 1934.

Dr. Hymen Alpern, formerly head of the Spanish Department at De Witt Clinton, became the third principal of Evander Childs in the fall of 1934. One of his earliest acts was to secure the re-naming of the Woodlawn Annex, as the Henry I. Norr Annex, in memory of the man who had so admirably sustained the fine traditions of the earliest years of our school.

Dr. Alpern has launched many innovations in Evander life, among them the Honor School, under Dr. Miles, and the Institute of Adult Education, now under Dr. Silver. Evander has had a glowing history and has attained an enviable place for herself in the educational world.

Gnomes and Drones

To be or not to be—optimists. That, fellow seniors, is the question. Whether 'tis nobler in the mind to say—We, the youth of America, go forth to conquer the world, or to say—We, the youth of America, pessimistically hesitate on the threshold of the world. Whereas when our parents set forth opportunities were waiting for them, we have to create our own opportunities.

But we have at least one consolation to harbor. We, today, are more aware of what is going on around us than the youth before us. We are more discriminating, more skeptical. Never before has youth been so well informed on the happenings of the nation and the world.

For years our elders have been saying, "Look at this younger generation; what will become of us when they take over the nation?" May we be so bold as to reply, "This is a fine world you are passing on to us. Dictatorships, civil war in Spain, war in the Far-East, another world war on the horizon, a nine year old depression still going! You certainly have given us plenty "to take over!" "

Down through the ages man has continually striven to conquer his most relentless and incessant enemy—Time. He has invented the most ingenious devices to aid him in his battle, yet ad infinitum he fights a losing war. We can but profit from the lesson experience teaches us and take advantage of every hour that time affords us.

While attending a school as large as ours we saw the need for cooperating with others. There has existed a feeling of security and consolation in knowing that your friends share your troubles. But from now on there will be no one to share your problems and worries. The burden must be borne alone, untiringly.

"Time and tide wait for no man." Let's not disappoint Time.

HEIGH-HO! HEIGH-HO!
IT'S OFF TO WORK WE GO!
Four brief years in Evander we've spent,
And now they tell us it's time we went.
Perhaps the powers-that-be are right:
Nestlings must sometime take to flight.
But oh, we've had such a lot of fun,
We hate to see these happy days done—
So let us glance 'ere the curtain falls
O'er our happy years in Evander's halls.
In bright fairy tale and nursery rhyme
We indite this record of that happy time.
And this Oriole of June '58
To our high school days we consecrate.

Pipsissewa and the Oriole

Down Bainbridge Avenue early in the morning—beautiful morning. On the right are the living, all-hailed by the sparrows and the starlings; on the left are the dead, saluted by a dawn as glorious as the great resurrection.

“How can they lie asleep, even in marble tombs, on a day like this?” I ask myself.

And I am answered by the voice of a little girl, “Oh we do not lie asleep.”

I look about and see no one. It’s the madness of Spring, I think, and rub my forehead.

The voice laughs at me; “You are startled at the voice of the dead, you who are forever feeding the words of the dead to live young minds. If the dead have anything it must be a voice, or else there is no Oriole in your libraries.”

“Now look here,” I say in my sternest manner, “let’s make sense, even if I have picked up a spook. Who are you?”

“I am Pipsessewa. A starling woke me saying my Oriole was flying; and there he is, with glorious wings stretched across the sky—the golden one, the comprehensive wisdom.”

Now I feel a warmth as of an arm in mine, and I feel a brightness as of two deep brown eyes. “Pipsissewa,” I say, “those are clouds, and the grandeur is the sun’s. And that,” I continue as we approach Gunhill Road, “is the Montefiore Hosp. . .”

“Temple of Healing,” says Pipsissewa, “for the leaves of healing are reflected by the sage-green roof over the red brick walls.”

We turn to walk down Gunhill Road under the modest maples, where the pigeons are feeding on the overflow from the breakfast nose-bags of the milkmen’s horses. And then—I see her. She steps over to smooth the mane of a horse. She has two long black braids of hair and a buckskin skirt, stone-hammered smooth as velvet.

“An Indian girl,” I exclaim, “you are an Indian girl!”

“Indian, you may say—but I am at least three hundred years old.”

“Well, I must say, Pipsissewa, you carry your age remarkably well.”

We walk along awhile, and then suddenly she stops. “Look,” says she, “red skins.”

I look toward Webster Avenue. “Only a red light, Pipsissewa.”

"Look," she repeats; and on looking again, I see arrows flying down the avenue and arrows flying up the avenue. Tomahawks descend, scalping knives flash. There is awful yelling and war-whooping.

"How often have I told that Serius he might be better employed than in making deadlier tomahawks and arrows," whispers Pipsissewa.

Then the scene fades, and taking her hand I remark, "Well anyway the light's green now and we can go across."

We cross—and I can tell you I hold Pipsissewa close, for a terrible rattle of gun-carriages and roar of artillery assail our ears.

"What now, Pipsissewa, what now?"

"Well," she says, "this is Gunhill Road, isn't it? You've heard of George Washington and the Revolution, I hope. How strange that you who deal in the words of the dead, should be so startled when you actually hear the voice of the dead."

"Maybe, but nevertheless all I want is to get to my school, Pipsissewa. I'd like to hear a bell ring. Please, Pipsissewa."

So the thunder rumbles into silence, rolling us across White Plains Avenue, where we hear the glad sound of the Monastery bells and down the glowing road we see a fort-like mass of bricks with flag flying under a brilliant sky.

"Ah, Dear old Evander, Pipsi. The Oriole is playing 'Dear old Evander' on the celestial color organ."

"But maybe," she says, "he is playing 'Let There Be Light!' Remember the spring, the deep spring in the swamp down under."

"I'll never forget it, Pipsi. After the stones were laid, the steel placed, and the bricks piled up, that everlasting spring pushed against the foundations. So they made a diabolical racket; tearing, pounding, dumping tons of stone and cement on the spring and sealed it with tar. I think now . . ."

She picks up my words. "I think now I have as little trouble getting out as I had before. You see, it was this way. Our chief called the war dance, and the warriors danced themselves into bloody wrath. Then I undid the dance by making soft eyes with some of his hardiest. The chief was angry and said, 'Ugh, Pipsissewa, go sit by the spring. I send for your parents.' It's an old, old custom, you see."

"At the spring I saw Serius. He had a strange game with the fish in the water. He would clap his hands and say, 'Dingo Ding' and all the fish would swim around in a great circle. Then he would clap his hands again, and the fish would separate into little quiet groups, nib, nib, nibbling of the water until they heard Serius's 'Dingo Ding' again, when they would all swim around in a circle once more.

"Serius said to me, 'You see they learn.' " Just then my Oriole began singing in a bough nearby, and all the fish jumped out of the water to hear his song. That angered Serius and he gave me a murderous shove. I splashed and sank, all the bubbles going out of me until I lay on the bottom. But looking up I saw my Oriole flying higher and higher and spreading and spreading until he covered the sky with a beautiful light.

"Well, that spring has been my sleeping place ever since. But every morning a sparrow or a starling awakens me saying, 'Pipsissewa, your Oriole is flying—the golden one—the comprehensive wisdom.' Then I come forth. But of recent years often the tingling of bells and the sound of thousands of feet, stamping round and round, awake me and I come forth. To remain invisible (I don't want my parents sent for—it would be a long wait) I enter and hide in first one young body and then another. It is fun to see how I look in as many different shades of skin as possible, and to see how the world looks through many, many thousand different pairs of eyes."

"Pipsi," I say, "this is very beautiful, but you have made me late."

"Don't worry," says she, "Go along now."

So I go along, but no one notices me when I enter, my card has been punched at the clock, and when I get to my room I find Serius teaching my class. I somehow know it is Serius, although he looks exactly like me.

"Whatever shall I do now," I wonder; but I see a flash of gold light over the head of a little girl who immediately goes to the desk. Serius disappears. I sit in the seat vacated by the little girl, and listen to her words.

"The Oriole is flying, the golden one, the comprehensive wisdom."

This is a true story—I hope.

ALBERT BLOHM

Back Through the Mists

Several years ago, at the time of our entrance into Evander Childs High School, the world was in a state of seemingly hopeless chaos. However, having been assured that education was the pathway to enlightenment, we entered Evander to learn how to solve the world's problems. And so we immediately proceeded to become more confused than ever! A seemingly inexplicable maze of rules, regulations, and unfamiliar customs confronted us. All these, our teachers carefully explained, were for our advantage. Looking back, we cannot help but agree with those teachers.

Upon our arrival at Evander we had our first contact with that elevating force, that exalting purpose, the Evander school spirit. Everyone, both of the student body and of the faculty seemed eager to help us. If ever we went up a "down" staircase, heaven forbid! the members of the patrol squads were always ready to help us by taking our names and frightening us out of a year's growth. The faculty, appreciating our desire to learn to be socially correct, were kind enough to provide us with student leaders who taught us which piece of silver(?)ware to use for each course of the sumptuous "specials" served in our cafeteria. Also we were taught what to say when we met people in order to keep them from committing assault and battery the first time they saw us. Little did we realize that some of us would one day become student leaders and be just as "helpful" to other freshmen so sorely lacking in the social amenities.

Gradually we became acquainted with the various Evander institutions. We learned that there was a General Organization and that it was our privilege to elect officers. Election times, with all the fierce campaigning, were particularly interesting. We were given the supreme thrill of parading around, festooned with campaign literature (shades of the old sandwich man!). The various candidates were allowed to bedeck the school with placards in the most beautiful kitchen-made artwork.

As we acclimated ourselves to the Evander customs and habits, we became truly ardent in our desire to fulfill the obligations which school tradition imposed upon us. In our zeal to do things the Evander way we memorized the pledge we had to sign at the beginning of each examination, the over-zealous of us going so far as to include in their memorization the "instructions to candidates." However, even these "zealous zealots" have not as yet found out what "prima facie evidence" (it must have been the work of our classically-minded Dr. Alpern) as used in these instructions means.

Besides ascertaining how to be good Evanderites, we also, within time, grew to know the various Evander personalities among the faculty. We learned how interestingly Dr. Alpern could conduct assemblies; how he

was always ready to launch off into a lesson in Greek (or that other foreign language, English). We learned that the estimable chairman of the speech department, and one time coach of the Evander baseball team, Mr. John B. Schamus, has certain vocal and tonal qualities which would qualify him to compete favorably with the Metro-Goldwyn-Mayer lion. We learned how nonchalantly Dr. B. Robert Silver could add one or two periods to a "first to the sixth" program. (Think nothing of it, my lad; I would do the same for anyone.) We learned that any student upon perceiving Mr. Quimby, could do an about-face with a speed and efficiency that would cause the members of the Health Education department to think Utopia had arrived.

We discovered among many other things: that Dr. Wells is a scholar who lets neither time, nor space, nor gloom of night retard his historical researches; that, besides teaching Biology, Mr. Mandl is also something of a snake charmer; that Dr. Deixel of the Latin department can tell a funny story and burst into laughter over it with as much ease as he can translate a passage from Cicero; that according to Mr. Friedlander, Napoleon, too, was a small man; that Mr. Zieph maintains that there are no laws in economics, that all existing laws are wrong and that all students know slightly less than nothing; that it was useless planning and fruitless trying to present Mr. Findlay and Miss Cuniffe with an assortment of aches, pains, or other maladies as excuses for cutting; that the grade advisers place still less faith in dead or dying grandmothers when they are used as excuses for absences.

It took us several years to learn all these things. During these years we underwent an evolution which changed us from confused and naive freshmen, to arrogant sophomores, to sophisticated juniors and finally to supercilious seniors. The school, too, had undergone an evolution of its own and by the time we had become seniors many changes had taken place. The traffic system had been changed, Monday was made unprepared day for all subjects, an escalator for the Gunhill Road station was—well, anyway it was proposed. Most notable of all changes, however, was the fact that we were now no longer unimportant lower termers, but SENIORS, knowing all the answers (at least until we were caught cutting some class). How different were we from the confused, frightened freshmen that entered the school several years ago! So confident were we in our immunity as seniors, that traffic monitors no longer held any fears for us. We even dared talk back to them (and had our names taken for our pains). Moreover, those of us who had already become members of the squads now had their chances to frighten other freshmen out of a total of several centuries of growth!

During our senior year the school underwent another quite remarkable change (or shall I say revolution). It suddenly became aflame with a grand blaze of color whose brilliance was comparable with that of the rising sun. . . . Boys suddenly began appearing in what almost seemed (oh horrors!) pink pants. Their feet were bedecked with socks whose color schemes brought to light hues and shades which were not included in the rainbow. The fairer sex, not to be outdone, wore equally picturesque costumes. In accordance with the ancient Evander tradition of signing, initialling, or decorating anything with a clear surface (witness Bridges, senior hats, senior year books, desks), the young ladies made their appearance in oh—the cutest little jackets which seemed to be a cross between a Walt Disney cartoon, the work of an overzealous tattoo artist, and an autograph album. During this new era, referred to as the sharp period in Evander history, "everything went." Trousers which appeared to be sorely in need of an invitation to meet their wearer's shoes, kerchiefs worn à la Russian Baboushka, hideous color combinations, summer shoes in the middle of the winter,—all were permissible. After several weeks of watching these "symphonies in color" shag, truck, and Big Apple go by, our scientifically minded students were in quite a dilemma, wondering how soon this mélange of color would result in a wave of dark glasses and dichromatism (color blindness to you).

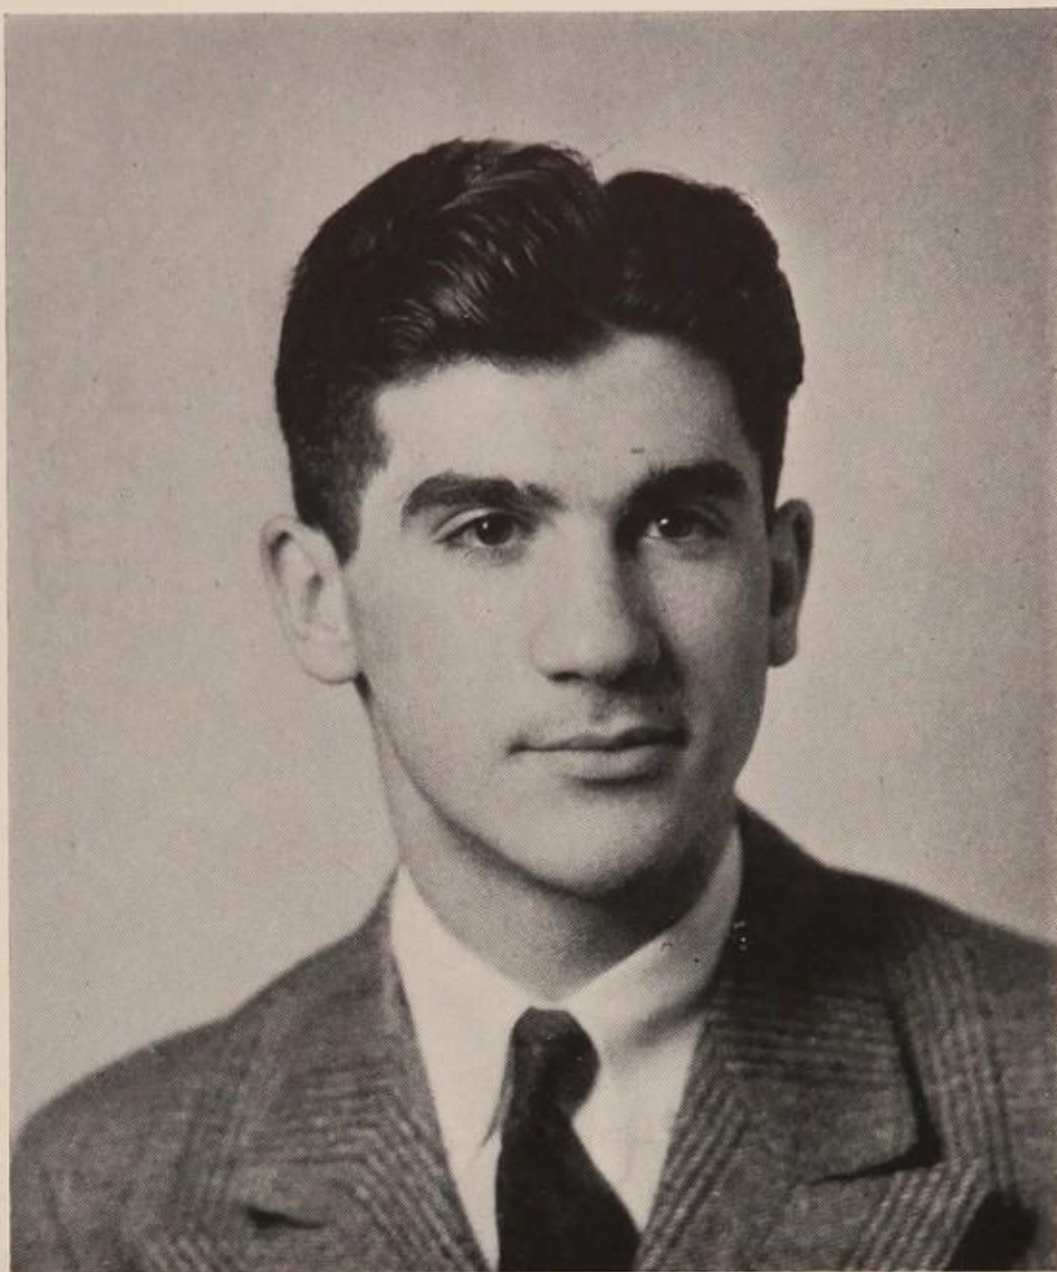

So much has Evander taught us. In addition we have learned many things, some of which will enable us to hold high and important positions in later life. From experience obtained in the Evander cafeteria many of us would be fully qualified to work our way through college as waiters in the Catskills. Evander likewise has prepared us to be better, more socially-minded citizens. Certainly an ex-Evanderite will never be seen putting gum on a seat in the subway (as do some of the barbarians who never went to Evander). He will at least have the decency to put it under the seat. Evander alumni will certainly take proper care of public property (after the way teachers insisted on covering books). Thus we see, that in addition to "book larnin'" Evander has also given us something which will enable us to live better and more wholesome lives.

King and his Henchmen

It is only as we approach the period of mature responsibility, that we learn increasingly to appreciate, not without a sense of astonishment at their inexhaustible patience, the worth and wisdom of those to whom has been entrusted the task of "leading us forth" into fresh educational pastures during the past four years. To principal and administrators, to advisers and teachers, as well as to the many others who have at some stage tended to the needs of the "flock," we turn in leave-taking to convey to you, however inadequately, the sense of our profound appreciation and the acknowledgment of a debt that shall be repaid some day with honor and interest. God keep you for many happy years at your fruitful tasks.

Lots of Luck!

Listen, My Children

Once upon a time, in the far away land of Graduation, there lived a beautiful princess named Diploma. Now, one of her loveliness should have had suitors by the score, but, unfortunately, such was not the case. For, you see, to get to the land of Graduation involved such unbelievable difficulties that few were willing to attempt it, even for such an inducement as Her Highness. Among other things, one had to cross the desolate forest of High School, which was known to be inhabited by all sorts of queer creatures, but especially by a wicked dragon called Regents.

So, many years rolled by, and of all the aspirants to enter the forest annually, only about three brave souls reached the other side alive, only then to pass away from shock and exhaustion. At this rate, despite the efforts of the finest matrimonial agencies, the princess seemed destined to remain an old maid.

But one fine day, there arose fresh from elementary school another youth who, too, was determined to try for the hand of Diploma. Evanderite (for that was his name), differed from all the others in that he lacked fear that characterized his predecessors. With stout heart Evanderite prepared himself for the journey to Graduation.

Evanderite's mother bade him a sorrowful goodbye and advised him to be especially careful of the sirens Spanish, Italian and French. As a parting bit of advice Evanderite's father told him to visit the Home of Conquered Valiants where the defeated Knights of Knowledge would tell him of their sad misadventures in order that Evanderite might benefit from their experience.

Off strode our hero to the home of these brave but broken heroes. The Knight of Q.E.D. spoke in tremulous tones of the devastating dragon, Geometry, couched in the tangled wilds of High School Forest. "Beware," he advised, "of Geometry's cunning axioms, propositions, and corollaries; they lured and then laid me low!" The Knight of Solecism advised thusly: "I sure never had no drag wit' that there Dragon English—excep if you mean gettin' dragged troo the swamps of Grammar and composishun for four long years, and coming out looking like a mud lotka!" Evanderite staggered dazedly toward the Black Knight Eco, from Nomics-on-the-Money, who imparted this gem of brilliant advice: "The Regents of Eco will ask you for theories that do not work, and exceptions to these theories that work only half as well. Believe it and you'll belong in this home, too!"

Thus, with words of wisdom and precepts of caution, Evanderite set off for the Forest of High School. He had not gone far when he met a math teacher. She was sitting all by herself and was weeping bitterly. It seemed that her entire geometry class, having read up on progressive education, had decided that math was bad for one's disposition, and so they had resigned in a body and were now taking Personal Regimen, instead. How they expected to cross the forest with that subject was more than she could see.

Our hero was a kind-hearted, not to say gullible, soul which accounts for the fact that he enrolled not only for a course in geometry, but for one in intermediate algebra, as well. For what seemed to him like centuries Evanderite studied, and finally, when he could prove two triangles congruent, he was allowed to continue on his way.

No sooner had he stepped out of the math class when he perceived a peculiar looking person sitting in a corner playing with a dead frog. "Why are you doing that, my good woman?" he asked politely. "I'm dissecting this beast, silly," was her curt reply. "You wouldn't ask such questions if you had a scientific mind. It's plain to see that you've just finished intermediate algebra. They all come out slightly befuddled. Now, what you need is a course in Advanced Biology. Here, sign on this line. Perhaps it was the effect of math, or else it was merely our ex-math prodigy's lack of sales resistance. At any rate, he signed and thereby spent the next two years dissecting frogs. He would have stayed longer, but the Bio teacher became exasperated,—after all, there are limits to one's patience—and at last she passed him.

This was now Evanderite's third year in the forest and he was beginning to wonder if the princess Diploma was really worth all this bother. It was a bother, you know, for besides the headache that his adventure was giving him (he had neglected to bring along aspirin to counteract the effects of too much learning), he had also accumulated a very fine, but painful collection of corns and callouses.

While he was thus nursing his sorrows, he heard the queerest sounds coming from a nearby hall. Upon investigating he saw a white-haired gentleman walking up and down, reciting a most incomprehensible monologue. Evanderite started to leave but the gentleman bellowed, "Hey! Hold on there! Don't go away!" Every time I try to decline that Latin noun, I frighten away all my students—even my prospective students. Like you, for instance. You *are* going to take Latin, aren't you?" "Why, yes, I suppose so." That settled it. The eager teacher and the bewildered pupil got down to business. At the end of an eternity of Caesar, Cicero, and Virgil, the course was finished, but the teacher still hadn't learned to decline the noun correctly. However, our hero had a dragon to meet, so he hastily bade the teacher goodbye.

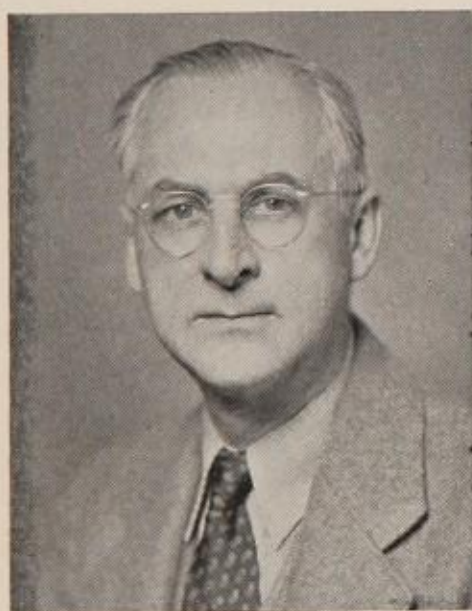

During the next few weeks he ambled merrily along, partaking of such subjects as Advanced Music, Advanced Art, and even the despised Personal Regimen. He was doing no homework, and thinking of nothing in particular when he stumbled into a dark cavern. He turned about to examine his surroundings, heard an agonizing wail, and discovered that he was among a group of Economics students. Having thus disturbed them, he felt that it would be downright rude to leave so abruptly. He therefore put down his load, secured an Eco book, and wracked his brain trying to find an economic theory that was workable.

After six months of this, everybody concerned was so horribly upset that for the sake of peace Evanderite was passed and was told in unrepeatable language to leave the place immediately. This he was glad to do. Evanderite staggered out of the Economics class and observed happily that his troubles were practically over. As a matter of fact, he could see the towers of the land of Graduation in the distance. His ecstasy was short lived, however, for he remembered that the dragon ought to be coming along shortly.

This thought served to make him more solemn, which was probably just as well, because before he was aware of it, he came upon the monster himself. Regents was a ferocious creature whose belt was adorned with the scalps of those who had met him before. Evanderite recognized many of his friends and a few of his enemies among these. As he stood there horror-stricken, the beast lunged at him. There followed a bloody battle which lasted a whole week (thereafter known as Regents week), and whose commotion was heard throughout the entire forest.

When it was over and everything was quiet again, there, to his own surprise, stood Evanderite, victoriously gloating over a dead, or at least unconscious, Regents. Joyfully he went to the edge of the forest where he donned a cap and gown and went to call on the princess. Needless to say, Diploma was delighted. After a very short time she married Evanderite and they lived reasonably happily ever after.

Words of Wisdom from the Magi

On the eve of your departure you beg of your elders council on the art of living. It is a gracious tribute, implying that to live long is to garner much wisdom. Despite your naive and all too evident fallacy, there is a kernel of truth in this. Every life, even the shabby and the inconsequential, shapes itself at last into a design which if viewed whole and in perspective, may be said to present an art or a wisdom. But this art or wisdom is irrevocably personal like a finger-print or a signature, and incommunicable.

Each long life, however, has also a scab, a protective crust, spawned by fear, which is generally offered to youth with grave solemnity. It is palmed off as wisdom, but it is only prudence. And prudence is precisely what you have no use for, seeing that you are the master of the treasury of time. It is the pauper's caution to the rich, replete with envy. What is prudence, indeed, if not the exchange of the largesse of sunny days for the cramped comfort of the rainy ones? You have but to watch the faces of many of your elders and catch the undertones of their words, to realize what tragedy may result from such a barter.

It will be argued that the rainy days must come to all—and should not one be prepared to meet them? Of course, one should—by making certain that they will be crowded with the many memories of the sunny ones! Unreal, and tinselled and purposeless, those days, it may be true, but so are all things, color and shape and perfume over which the sun, king of flatterers, deigns to smile. Yet, who but the fool and the willful blind turn their backs upon the glorious carnival of the magic Falsehood?

There are no duplications in nature or in history, and every individual, as every generation, is unique and inimitable. You are, therefore, not only a new creation, but the world which you are about to confront is also new and unparalleled. What spirited youth, then, would even for a moment contemplate distorting his personality that it might fit into the grooves of another? Who would wander groping among the mazes of strange patterns?

You must, on the contrary, duck-like, shake off the inevitable floods of warnings and dire prophecies of those who no longer capable of living, weave sad and terrifying commentaries upon life. You have but one need—and it pulses in your veins—courage! Courage! So turn the knob, throw the door wide open, and hail your destiny with a shout of triumphant laughter! AVE! VALE!

PAUL ELDRIDGE

This little piece is a mirror designed to reveal you to yourselves. I hope it is a good mirror, yielding a sharp and clear image and that the face you see will be a familiar one. But of that only you can be the judge.

G. B. Shaw once said that it is a shame the way youth is wasted on young people who don't know how to enjoy it. Presumably, it is to the oldsters learned in the ways of the world—the mathematics of pleasure and the chemistry of pain—that youth should be given. Actually, of course, we spend all our lives studying how to live and then when we think we finally have learned our lesson, we find few opportunities to recite. Youth ought not to be wasted. It should be a thrilling, joyous period. The springtime of life is full of promise and bloom and hope. But this is all theoretical. That is the way it looks to us old fogies. In reality, youth is beset by problems, not necessarily grim and tragic ones, but serious difficulties, nevertheless.

Young people are suspended between two worlds, or rather between two lives; one not yet dead, the other not quite born. You are growing into life, that is, slowly taking on the habits and thoughts of adults, and saying a long, lingering good-bye to childhood. Goodbyes to something we love are always hard and a little sad. We cannot quite drop hold of the hand and turn away.

There are countless adjustments you have to make as you meet new experiences of all kinds and gradually shed the disguise of childhood you have been wearing so long. It is not easy to carry on the game of make-believe day after day, for you and for those into whose care you have been entrusted.

Indeed, it is difficult to be neither caterpillar nor butterfly. People, it would seem, cannot decide what to ask of you. At one moment you are criticized for being a child—since that is the very moment when parents and teachers want you to be an adult. The next minute you are chided for trying to be a grown-up, for that is precisely the time when they want you still to remain a child. You must not mind this too much, for young people have always been treated thus. We, your parents and teachers, were once young like you, strange as that may seem to you, and we also used to grow confused at times in trying to fathom the caprices of adults. We too could not easily decide on the type of person we wanted to be or the style of life we wanted to lead. You must be patient with us if we forget that we were once what you are now.

You are trying to learn the lines of a new part you are soon to play. But you are not quite ready to step out on the stage. Restless as you may become with the child's role which you know so well, too well you exclaim, you yourself are afraid to let go of it. You are puzzled and hesitant because you are not entirely what the world expects of you or what you should expect of yourself. Life is a kind of picture puzzle you are trying to read aright.

Young people, like all human beings, want three things: freedom, security, love. These are the most powerful hungers we have. You want freedom, you are fascinated by the novelty and privileges of the world outside your home. But you don't know what freedom is or what kind you want. You rebel, but you don't know just what it is you are rebelling against. You think it means rejecting school, routine, old friends. And you don't want to remain sheltered and protected by your parents forever. But you cannot accept freedom, because it has its dangers and responsibilities. You see, you also want security and that means all the things you discarded in the chase after freedom.

The same is true of love. You are groping towards the love of the opposite sex, you are making the first tentative search for a mate, and obtaining an invaluable education here, but there is still the powerful tie to your parents, a love attachment of another kind that you are not willing to admit is still primary.

You want freedom, love, security—it is true. But you are not yet ready for these in adult terms. This you do not realize and will not accept.

If you think back, perhaps you will recall that there have been two themes on which you have pondered upon every single day of your high school career, though neither you nor your elders have been fully aware of them. They are: "What do young people need in order to be happy?" and "What do I want of life and how am I going to get it?" Many of us eventually answer these questions to our satisfaction: some of us never find a thoroughly adequate answer.

For every life period has its pleasures and joys, its responsibilities and problems. Make the most of what youth offers you (I really don't believe that it is wasted on young people), and then become an adult without any backward looks. Adulthood too has much to offer you, though you cannot expect it to be completely smooth sailing. And so, across the years I salute you and wish you "bon voyage."

GEORGE LAWTON

Senior Personalities

DOROTHY ALPERN—Meets the exigencies of all crises with the inevitable solution, “Don’t be silly!”

EDWARD BAUMANN—Carries his major “E” to new physical, moral and intellectual altitudes.

WILLIAM BRENNER—Ubiquitous, ineluctable, peremptory, inexorable—“Don’t you owe me something?”

HENRY BUCK—Doesn’t bring ’em back alive; hasn’t got that kind of teeth; doesn’t pass himself!

THOMAS CASNER—Foot-loose and fancy free, a playboy who pulls cheers from the crowds.

RITA DAY—She “double dares” you to attend the prom and not have a barrel of fun.

ELBA DI GIOIA—She does the shag and wears an “E” so very, very graciously—our peach Elba.

GEORGE FREAS—He wins picture fame, Big Apple cups, football games and ladies’ hearts.

LUCILLE KUTTNER—Whether it’s painting, writing or dancing she wins the crown every time.

HILDA LUBLINER—Expert at a game which requires nine men to perform—and puts them all to shame!

MILDRED LUTZER—Why is it that when beauty meets brains, the combination thinks naturally of money?

ALFRED MASCIA—Not to be confused with anyone of the same name, physiognomy, stature or interests.

ARMAND MASCIA—Not to be confused with—Oh, for Pete’s sake you try!—we’ve muffed for four years!

MATILDA MILLER—Evander’s eminently ebullient, egregiously enticing, enchantingly exuberant elf.

JEROME PECKINS—Blakely’s gift to the Main and winner of the international sharpie contest of the Bronx!

THERESA RINK—Perfectly named: dozens of suitors skate ’round ’til they fall in sheer dizziness!

ESTELLE RODRIGUES—Did she finally make the Personality Group Picture? I hope, I hope!

MINNIE ROSEN—She’s the social center of the Bronx Social Center of the social center of New York!

LISA ROSENKRANZ—I’d like to be pent up in a Pent House in the clouds on Park Avenue!

ANITA SHERMAN—Her famous namesake only said some strong words about War; Anita fights it.

TOM SKEAHAN—Laugh and the world laughs with you; scowl and it laughs at you. So smile!

BETTY SPRAGUE—“If it’s the last thing I do, I’m going to college—and I guess it’ll be the last thing.”

EVE STEINMETZ—Carries herself with the greatest of “E’s,” walks with an air of “I do as I please.”

CLAIRE TRAINOR—As luscious as a big apple, golden as a day in May, trim as a sail in the breeze.

FRED WEHRMAN—Oh, where is there a man like Fred—one who shags in a manner well bred!

Graduates

ABRAMS, SYLVIA, 1907 Loring Place. Sp. Club; Traffic Squad; Pres. of Class. Her tones are liquid aqua pura. She hopes to sing coloratura. Has intentions of going to Juilliard School.

ADAMS, JOSEPH WM., 568 E. Fordham Road. Glee Club. Sing a song of sixpence, a song that's hard to sing, But little Joseph Adams would make the rafters ring. Juilliard Scholarship.

Opportunities for High School Graduates

There are more opportunities for employment in the field of business today than in any other vocation. Many High School Principals and Vocational Guidance Counsellors advise students to take business courses if they have not definitely determined their choice of career, since the training thus obtained has proved

to be valuable in every field of endeavor.

Rhodes School offers courses leading to Secretarial, Accounting, and Junior Executive positions in the business world. The time required depends upon the course selected and previous education. Graduates of commercial high schools complete advanced training quickly and are entitled to employment assistance.
